EXPERIENCE

DeepAware AI (Robotics Center of Silicon Valley) · Robotics Intern San Francisco, CA · Jun – Aug 2026

- Built motor control and teleoperation software for the OpenArm robot arms, including simulated teleoperation driven from a Meta Quest, and shipped the control repository to clients with an emergency motor-kill hotkey.
- Built waypoint navigation for a Unitree Go2-W quadruped after the vendor lidar stack could not self-localize, and delivered the demo solo to a visiting client engineer.
- Consolidated a fragmented multi-repository codebase into one robot control repo with git submodules and a required-review workflow. Ran the robot arm table and presented to roughly 200 people at the company Builders Conference.

Frizzle (Y Combinator S25) · Software Intern Remote · May – Aug 2026

- Built WarmStack, the company cold-email infrastructure covering domains, mailboxes and deliverability at roughly 1,000 emails per day, then ported it into the main product repository.
- Launched a live campaign for a public school district client, roughly 600 of 1,091 contacts emailed within 48 hours. Built a grant scraper on Render and shipped an AI humanizer with a plagiarism checker as the closing deliverable.

PROJECTS

Juber · Lead Developer Jun 2026 – Present

Ride-share app for the Jain Center of Northern California. Supabase, Vercel, web and mobile.

- Run a six-person volunteer team hired from 10 applicants across 5 defined roles. Wrote the role profiles, ran the interviews, and recruited two board members as advisors.
- Built driver safety gates, rider live directions with queue-aware ETAs computed against the driver's real pickup order, and a mobile-first admin console. Found six substantive defects in a draft liability agreement before it reached counsel, and re-costed the stack from an assumed \$300 per month to \$45–75.

Schoology tooling · sgy, jv, bim, Pace Aug 2026

- Built **sgy**, a Python command-line Schoology client, after the district declined to issue students an API key. Rejected existing tools because the session token is httpOnly, drove a headless browser profile against the internal JSON endpoints, and generalized it for other districts.
- Built **jv** (maps 537 files of a course site) and **bim** (joins posted homework to the right textbook pages), then **Pace** on top of sgy: an assignment feed grouped by urgency and a grades view with weighted categories and inline hypothetical scores. React 19, Vite, Express.

Trading systems Mar 2026 – Present

- Passed the Topstep evaluation in June 2026 and trade a live funded futures account. Built a mean-reversion system in Python on the Interactive Brokers API (ib_insync) targeting GBPJPY and EURUSD off a 9:30 AM New York open anchor, with an eight-phase backtest pipeline and live automation through TradingView webhooks.

Also built: an internship outreach CRM (React, TypeScript, Node, Gmail API) over roughly 400 companies, with email discovery via DNS MX lookups and pipeline state reconciled live from Gmail. **Ascenta**, a gated platform with Firebase auth and access-code billing, sold to about 20 paying students. **physics7c.vercel.app**, a study site on waves, superposition and interference.

TOOLS

Languages Python, JavaScript, TypeScript, Java, SQL

Stack React, Node, Express, Vite, Next.js, Supabase, Firebase, Vercel, Render, Git

Robotics & data CAN bus, Raspberry Pi, Isaac Sim, Meta Quest, Interactive Brokers TWS, TradingView

Approach AI-assisted development (Claude Code, Cursor). Owns architecture, product decisions, code review, debugging and deployment.

EDUCATION

Monta Vista High School · Class of 2030 Cupertino, CA

Accelerated placement in Algebra 2/Trigonometry and Spanish 2. Coursework in Java and Biology.

MUSIC AND ACTIVITIES

Tabla · Tabla Niketan, Cupertino, under Shri Satishji Tare 2016 – Present

- Completed Madhyama Pratham on the Sangeet Visarad certification path, preparing for Madhyama Poorna in November 2026. Silver, Cupertino Emerging Artist Award 2025. Most Promising Young Artist, Jain Got Talent (International) 2021. People's Choice, YJA convention talent show 2026.
- Regular accompanist at the Jain Center of Northern California and Bay Area Vaishnav Parivar, and has taught tabla to children for over five years.
- FIRST LEGO League**, Team ShortCircuit #58828, four seasons 2020–2023, across the hybrid energy, hydroelectric, smart grid and solar farm challenges. Won the local competition, second at the regional championship. Also runs a sanctioned President's
